SOFTWARE ENGINEER

ABOUT ME

I am a dedicated .Net Developer with a passion for crafting efficient and user-centric software solutions. Armed with a strong foundation in computer science and extensive experience in C# and ASP.Net, I excel in creating scalable web applications. My analytical mindset and collaborative nature enable me to deliver high-quality projects within deadlines. I thrive on staying updated with the latest technologies to create innovative solutions that drive business growth. Let's build the future together through code and creativity.

EDUCATION

Bachelor in Computer Science

Oct.2018 -Sep. 2022

- University of Sahiwal

SKILLS

- C# Programming
- ASP.NET
- .NET Core
- Web Application Development
- MVC Architecture
- RESTful APIs
- SQL Server
- Entity Framework
- HTML/CSS/JavaScript
- Git Version Control
- Unit Testing (NUnit, xUnit)
- Dependency Injection
- Design Patterns (MVC, Singleton, Factory)
- Performance Optimization
- Debugging & Troubleshooting
- Security Practices
- Agile Methodologies (Scrum, Kanban)
- CI/CD Pipelines
- Frontend Integration
- Cloud Integration (Azure, AWS)
- Collaboration
- Problem-solving
- DAX Functional Support
- PowerBI Developer

REFRENCES

- References will be provided upon request.

WORK EXPERIENCE

Full Stack Developer

GoFinance (Remote)

January 2024 - Continue

- Develop, implement, and maintain web applications using ASP.NET Core, Web API, and ASP.NET MVC.
- Collaborate with cross-functional teams to design, develop, and deploy scalable software solutions.
- Write clean, efficient, and secure code adhering to coding standards and best practices.
- Troubleshoot and debug applications to ensure optimal performance and reliability.
- Integrate data storage solutions and third-party APIs as needed.
- Stay updated with the latest technologies and industry trends to continuously improve development processes.
- Participate in code reviews, knowledge sharing sessions, and team meetings.
- Document software designs, requirements, and implementation details.

NET Developer

DukanLay Solutions Pvt Ltd

January 2022 - December 2023

- Develop, test, and maintain robust and scalable web applications using the .NET framework.
- Collaborate with cross-functional teams to understand business requirements and translate them into technical solutions.
- Design and implement RESTful APIs for seamless integration between different components of the application.
- Utilize your proficiency in ASP.NET, .NET Core, and related technologies to create efficient and elegant web applications.
- Write clean, maintainable, and well-documented code while adhering to coding standards and best practices.
- Conduct unit testing to ensure code quality and reliability, and participate in code reviews to promote knowledge sharing and continuous improvement.
- Work closely with front-end developers to integrate user interfaces with back-end functionalities.
- Troubleshoot and debug issues, optimizing performance and ensuring smooth application functionality.
- Collaborate in an Agile development environment, participating in stand-ups, sprint planning, and other Agile ceremonies.
- Stay updated with emerging technologies and trends in the .NET ecosystem, suggesting innovative solutions and improvements.
- Contribute to the development of CI/CD pipelines for automated testing, building, and deployment processes.
- Maintain a strong awareness of security best practices and implement secure coding techniques.

PROJECTS
